Product Code: KEN5404250K
Brand : Kennedy

665x560x50mm GALVANISED DRIP TRAY

Product Information :

Available in capacities of 5 or 8 litres as well as with or without a mesh cover, this range of galvanised steel drip trays provide an easy and efficient way of preventing spillages. For use in areas where fluid may have a tendency to leak or spill, these trays effectively catch any excess fluid in a safe and controlled manner for your disposal or reuse. Each product also features a reinforced beaded rim that also doubles as a carrying handle.

Features and Benefits
• Manufactured from galvanised steel making it a durable product
• Saves on wastage as you can catch excess materials in the tray to be reused
• Allows you to keep your work station tidy when using messy materials
• Possesses a reinforced beaded rim that also works as a carrying handle for ease of transportation

Typical Applications
• Ideal for a host of uses in various industries including the automotive, any manufacturing that requires oils or fluids, industrial use and for use in chemical plants

EAN Code - 5036140259171
