Overview

Ragni Feather Edge aluminium hawks are available in 3 sizes (8” 12” and 14” variations), they all feature premium quality aluminium blades. The blades have hidden internal rivets with fix the blade to the backing plate, ensuring that the blade surface is clear of anything that could cause damage to the blade of the trowel. The blade surfaces all have circles to hold the plaster in place and prevent slippage and the hawk’s edges are smooth and free from burrs. They are supplied with a soft grip ergonomic hand and foam ring to protect the knuckles while delivering maximum comfort.
