INSULATED WIRE STRIPPER - 6"/160mm

This VDE Insulated Wire Stripper provides safe, precise stripping of electrical wires in live or potentially energised environments. Designed for professional electricians and technicians, it meets IEC 60900:2018 standards and is tested to 1000V AC / 1500V DC to ensure reliable electrical protection. The precision-ground cutting edges allow for clean insulation removal without damaging conductors, while the adjustable stripping mechanism supports a range of wire sizes. Constructed from high-quality chrome-vanadium steel with dual layer insulated handles, it combines durability, comfort, and safety.

Features and Benefits

- Precision-ground stripping jaws deliver clean, accurate removal of insulation without nicking conductors
- Adjustable stripping mechanism accommodates various wire sizes for versatile use
- Forged chrome-vanadium steel construction provides strength, durability, and long service life
- Dual-layer insulated handles enhance comfort and grip while preventing electrical shock
- Smooth spring-return action improves efficiency and reduces operator fatigue
