INSULATED CABLE CUTTER - 8"/200mm

These VDE Insulated Cable Cutters are precision-engineered for professionals working safely on or near live electrical systems. Certified to IEC 60900:2018 and rated for 1000V AC / 1500V DC, they provide dependable protection against electrical shock while ensuring clean, effortless cuts through copper and aluminium conductors. Constructed from hardened chrome-vanadium steel, these cutters deliver superior strength and edge retention for consistent performance under demanding conditions. The dual-layer insulated handles offer a secure, non-slip grip for enhanced comfort and control, even during prolonged use.

Features and Benefits

- Precision-ground cutting blades deliver clean, burr-free cuts on copper and aluminium cables, improving work quality and efficiency
- Chrome-vanadium steel construction provides exceptional durability and long-lasting cutting performance
- High-leverage joint design reduces hand effort for smooth, easy cutting through tough conductors
- Ergonomic dual-layer insulated handles ensure a comfortable, secure grip for improved control and reduced fatigue
- Corrosion-resistant finish protects against wear and extends tool life in demanding environments
