INSULATED DIAGONAL CUTTING PLIER - 7"/180mm

These VDE Insulated Diagonal Cutting Pliers are precision-engineered for safe, efficient wire cutting and trimming in live electrical environments. Certified to IEC 60900:2018 and rated up to 1000V AC / 1500V DC, they provide dependable protection from electric shock while ensuring clean, accurate cuts. Designed with hardened chrome-vanadium steel blades, these pliers deliver exceptional sharpness, strength, and longevity for repeated professional use. The ergonomic, dual-layer insulated handles enhance grip comfort and control, even during prolonged operation.

Features and Benefits

- Induction-hardened cutting edges ensure sharp, clean cuts through copper, aluminium, or soft steel wires
- High-leverage pivot design reduces hand effort, improving cutting efficiency and user comfort
- Chrome-vanadium steel construction provides superior durability, strength, and resistance to wear
- Ergonomic dual-layer handles offer a comfortable, non-slip grip for secure handling and reduced fatigue
- Corrosion-resistant finish preserves cutting edge integrity and tool lifespan in demanding environments
