PPS SQKIT - PRE-ASSEMBLED CONFIGURATIONS

PPS SQ - Kit for General Applications

The Prevost PPS SQKIT is a plug and play system (internal Ø 25mm) that distributes compressed air directly to a workstation. Designed to optimize the delivery and control of compressed air systems, the PPS SQKIT embodies quality and reliability, ensuring minimal air loss and maximum performance.

PRE-ASSEMBLED DESIGN

The PPS SQ Kits deliver all the hallmarks of Prevost's commitment to innovation and quality, offering preassembled solutions that simplify compressed air management. Save time and reduce installation complexity with a plug-and-play solution that's ready to go the moment it's unboxed.

ALUMINIUM SQUARE PIPE

Compatible with the most common workstation profiles on the market, the square PPS SQ pipe from Prevost is designed and adapted for your workstation, offering 100% aluminium construction for lightness, strength, exceptional quality, and guaranteed leak-free safety.

EFFICIENCY

The PREVOS1 couplings included in the kit, with their innovative design, ensure a perfect seal and provide excellent robustness. In a network, the most common leak occurs at the connection between the coupling and plug. The combination of the PREVOS1 coupling and the Prevost plug ensures a perfect seal and comes with a 3-year guarantee against leaks.

Max. operating pressure	Min. / Max temperature
12 bar	-15 / 70 °C

Part number	Length (m)	For pipe OD	ID passage (mm)	Profile	Net weight (Kg)	Dim. A (mm)	Dim. B (mm)
