INSULATED BENT NOSE PLIER - 8"/200mm

These VDE Insulated Long Nose and Bent Nose Pliers are engineered for professionals who require precision handling and complete electrical safety. Certified to IEC 60900:2018 and rated up to 1000V AC / 1500V DC, these pliers safeguard against electric shock while delivering accurate grip and control in confined spaces. The long nose design enables secure access to tight areas, while the bent nose option offers angled versatility for component positioning and wire manipulation. Constructed from hardened chrome-vanadium steel with dual-layer insulated handles, they combine strength, durability, and comfort for extended use.

Features and Benefits

- Precision-machined jaws deliver firm grip and control for fine electrical and mechanical work
- Long and bent nose options provide access to confined or angled spaces, improving reach and versatility
- Chrome-vanadium steel construction offers exceptional strength, durability, and resistance to wear
- Ergonomic dual-layer handles enhance comfort, grip stability, and fatigue reduction during extended use
- Corrosion-resistant finish maintains long-term tool integrity and performance
