INSULATED COMBINATION PLIER - 8"/200mm

The VDE Insulated Combination Pliers are essential multi-purpose tools for professionals working on live electrical systems. Certified to IEC 60900:2018 and rated for 1000V AC / 1500V DC, they provide exceptional protection against electrical shock while delivering high performance for gripping, bending, cutting, and twisting applications. Precision-engineered from chrome-vanadium steel, these pliers combine strength and durability with finely machined jaws for reliable grip on wires and components. The dual-layer insulated handles ensure a comfortable, non-slip hold for enhanced safety and control, even in demanding environments.

Features and Benefits

- Chrome-vanadium steel jaws ensure exceptional strength, durability, and long-lasting cutting performance
- Multi-functional design allows for gripping, twisting, crimping, and wire cutting in one versatile tool
- Induction-hardened cutting edges provide precise, clean cuts on copper, aluminium, and soft steel wires
- Ergonomic dual-layer insulated handles offer a secure, comfortable grip that reduces user fatigue
- Corrosion-resistant finish maintains performance and tool integrity in tough working conditions
