KENNEDY PROFESSIONAL

DATA SHEET

Heavy-Duty Riveting Tool

With a steel construction, this heavy duty riveter possesses a unique mechanism that reduces operator effort by 40%. With an ergonomically designed PVC handle for extra comfort and grip, it ensures high quality results as well as being user friendly. The quick change nozzles are stored in the handle and the product can be used with one handed operation.

Features and Benefits

- Overall length: 230mm
- Steel construction for durability and overall product longevity
- Has a one handed operation to allow you to easily attach rivets even at awkward angles
- Ergonomically designed PVC handle for bolstered grip and comfort when using
- Nozzles are designed for quick change to save the user time
- Nozzles can be stored in the handle to easily keep track of where they are

Typical Applications

- Ideal for use when attaching sheet metal or fibreglass to other materials and instances where nails wouldn't be as effective as rivets

Complete with 4 Nozzles for rivet sizes:

2.4mm (3/32")
3.2mm (1/8")
4.0mm (5/32")
4.8mm (3/16")
