INSULATED PHILLIPS SCREWDRIVER - PH0 x 75mm

These Insulated Phillips Screwdrivers provide professional-grade safety and precision for electrical work on live or energised circuits. Each tool is VDE-tested and certified to IEC 60900:2018, offering protection up to 1000V AC / 1500V DC, ensuring complete operator safety when working near electrical components. The chrome-vanadium steel blade delivers exceptional strength and durability, while the precision-machined Phillips tip ensures a perfect screw fit, reducing cam-out and wear. Each screwdrivers' dual-layer insulated handle offers a comfortable, non-slip grip and visual indication of insulation integrity.

Features and Benefits

- Chrome-vanadium steel blade delivers superior torque and long-term durability under frequent professional use
- Precision-engineered Phillips tip ensures accurate screw engagement, minimising slippage and damage to fasteners
- Dual-layer insulated handle provides comfortable, anti-slip control and an added visual safety layer
- Ergonomic grip design reduces hand fatigue and improves control during extended electrical or mechanical tasks
- Clearly marked tip and size on handle allowing for quick tool identification in toolkits or work environments
