Quick-change frame for roof-mounted cooling units – SK 3286.800

created: 26.04.2021 build on www.rittal.com/uk-en

Product description

Description:	The quick-change frame is more than just an alternate frame. Together with the seal, the lower part of the frame is screw-fastened to the enclosure. In this way, it is possible to install and remove the connector-ready cooling unit with the upper part of the alternate frame previously mounted on the cooling unit with quick-release fasteners. During servicing work, this means shorter assembly times and hence minimised downtime. What is more, the quick-change frame offers effective protection against the ingress of oil into the enclosure in oily atmospheres, thanks to its integral drainage trough.
Material:	Sheet steel
Colour:	RAL 7035
Supply includes:	Quick-change frame Seal Quick-release fasteners
To fit Model No.:	3209.... 3210.... 3383.... 3384.... 3385....
