INSULATED SCREWDRIVER SET - 7 PCS

This 7-Piece VDE Insulated Screwdriver Set delivers maximum safety and precision for professionals working with live or potentially energised electrical systems. Each tool is rigorously tested to 1000V AC / 1500V DC and fully compliant with IEC 60900:2018, ensuring protection against electrical shock. The set includes a comprehensive selection of slotted and Phillips screwdrivers (SL2.5-SL6.5 and PH0-PH2), making it suitable for a wide range of electrical and mechanical applications. Each insulated screwdriver features ergonomic, dual-layer insulated handles for superior comfort and secure grip, alongside precision-machined tips that ensure optimal torque transfer and reduced fastener wear.

Features and Benefits
- Precision-machined tips ensure accurate fastener engagement, reducing wear and slippage
- Ergonomic dual-layer handles enhance comfort and grip, improving control and reducing fatigue
- High-grade chrome-vanadium steel shafts deliver exceptional strength, torque, and durability
- Comprehensive 7-piece selection includes four slotted and three Phillips sizes for versatile electrical and mechanical tasks
- Clearly marked voltage and size indicators allow for quick tool identification during work
- Supplied in a durable storage case keeping tools organised, protected, and easily accessible
