INSULATED SLOTTED SCREWDRIVERS - SL5.5 x 1 x 125mm

These VDE Insulated Slotted Screwdrivers deliver professional-grade safety, precision, and durability for electrical and industrial work on live systems. Each screwdriver is VDE-tested and certified to IEC 60900:2018, ensuring reliable protection up to 1000V AC / 1500V DC. The chrome-vanadium steel blade provides outstanding strength and torque, while the precision-machined slotted tip ensures a perfect fit to prevent slipping and fastener damage. Featuring a dual-layer insulated handle, the design guarantees a secure, ergonomic grip and visual safety assurance.

Features and Benefits

- Hardened chrome-vanadium blade delivers superior torque, strength, and long service life
- Precision-ground slotted tip provides an exact screw fit, preventing slippage and wear
- Dual-layer insulated handle has an ergonomic, non-slip design with visual layer for added safety assurance
- Optimised balance and grip reduce hand strain and enhances control during precision tasks
- Clearly marked tip and size allow quick identification and selection on-site or in tool kits
