INSULATED SCREWDRIVER FOR TORX SCREWS - T27 x 125

These Insulated Screwdrivers for Torx Screws provide outstanding electrical safety, torque precision, and durability for professional electricians and engineers. Each tool is VDE-certified and tested to IEC 60900:2018, guaranteeing insulation protection up to 1000V AC / 1500V DC. Designed for demanding electrical, industrial, and HVAC environments, their hardened chrome-vanadium steel blade delivers excellent strength and wear resistance, while the precision-machined Torx tip ensures an exact fit for optimal torque transfer without cam-out. The dual-layer insulated handle combines ergonomic comfort with a clear visual safety indicator, promoting secure, fatigue-free use during live work.

Features and Benefits

- Hardened chrome-vanadium steel blade provides high torque strength and long-lasting performance
- Precision-machined Torx tip ensures exact screw engagement for superior grip and reduced wear
- Dual-layer insulated handle has an ergonomic, anti-slip design with visual safety indicator for secure handling
- Shock- and heat-resistant insulation prevents accidental contact and deformation during intensive electrical work
- Clearly marked tip and size simplify tool selection and enhances workflow efficiency
