14mm OFF SET CV COMBINATION SPANNER

Manufactured from chrome vanadium steel, these metric sized offset combination spanners are ideal for use across varied industries. Possessing a 15° cranked open end and an offset ring end at 50°, each product is up to 25% longer than conventional DIN 3113 combination spanners. Finished with a chrome plating, the product is available in an array of sizes.

Features and Benefits

- Available to purchase in a range of metric sizes to ensure you have the correct size for your desired applications
- Manufactured from chrome vanadium steel making for a highly robust product
- Chrome plated finish protects the product from corrosion as well as more general wear and tear
- 15° cranked open end for access even in confined or restricted spaces
- 50° ring head angle for turning in awkward places
- Each product is up to 25% longer than conventional spanners for a greater reach
