KENNEDY PROFESSIONAL

DATA SHEET

1/4" Bi-Hexagon Socket, 9mm - Metric

Ideal for assembly and servicing of small precision mechanisms associated with electrical, electronic, ignition and refrigeration work, this socket is designed to be hard wearing. Boasting a double knurl design, a 12 point bi-hexagon side drive and chrome vanadium construction, the product is suited for professional use.

Features and Benefits

- Manufactured from chrome vanadium steel for durability
- Higher torque given due to the 12 point bi-hexagonal side drive
- Chamfered leading edge ensures easy fastener location to keep you working efficiently
- Aluminium free construction ensures non-sparking for use in garages

Technical Specifications

- Material: Chrome vanadium steel
- Chrome plated mirror finish
- Drive size: 1/4"
- Drive type: Square
- Socket size: 9mm
- Socket depth: Deep
- Number of points: 12
- Bit type: Bi-Hex
- Overall length: 50mm

Typical Applications

- DIY
- Automotive
- Construction
