½" SQUARE DRIVE 8mm SOCKET

The Kennedy range of 1/2 inch square drive metric bi-hexagon sockets, sized from 8mm to 36mm, delivers exceptional torque and precision. Crafted from durable vanadium steel with a corrosion-resistant finish, these 12-point sockets provide secure engagement and excellent grip on worn or stubborn fasteners. Featuring a ball-retaining groove for positive connection, they are designed for professional use, combining high performance with long-lasting reliability.

Features and Benefits
- ½ inch square drive for compatibility with standard tools
- Metric sizes from 8mm to 36mm for versatile applications
- 12-point bi-hexagon socket type for superior grip and torque
- Side drive design requires only a one-twelfth turn to reposition
- Effective on worn fasteners to reduce rounding
- Ball-retaining groove ensures secure fit with accessories
- Made from tough vanadium steel for strength and durability
- Corrosion-resistant finish extends tool life
