HEAVY DUTY ROLLER STAND

This heavy-duty roller and ball stand offers robust construction and versatility, making it essential for workshops and job sites. The stand features all-steel welded construction with 51 mm tubing for superior stability. It adjusts from 758 mm to 1197 mm with twin lock-knobs, ensuring safe support. The 60 mm diameter bearing roller has a spring-loaded axle. It converts from a roller stand to a ball stand with 8 steel balls for multidirectional movement. Pre-assembled and ready to use without tools, it provides convenient, efficient material support.

Features and Benefits

- All-steel welded frame with 51 mm tubing ensures superior stability and durability
- Adjusts from 758 mm to 1197 mm with twin lock-knobs for secure height settings
- Load does not drop during adjustment, ensuring safe use
- Converts from roller stand to ball stand in seconds for various applications
- Features a 60 mm diameter x 14¾" bearing roller with spring-loaded axle for smooth operation
- Ball stand includes 8 steel balls for movement in any direction
- Ready to use with no tools required for quick setup and operation
