QUALITY INDUSTRIAL TOOLING

DATA SHEET

Magnetic Base Angle Finder

With a powerful, ceramic magnet base, this angle finder can be used either as a 'quick check' tool or to convert a rule or square into a precision angle finder.

Features and Benefits

- Accuracy: ±0.5%
- Size: 80mm (3-1/2")
- Large scale for readings from 0 to 90° in any quadrant
- High strength ceramic magnet to help measure pipes and other magnetic materials
- Boasts a V-groove to make it easier to use on bars and pipes
- Solutions to right angled triangles printed on reverse of finder

Typical Applications

- Woodworking
- Carpet Installation
- Plumbers
- Construction

Note:
Possessing a V-groove, an accuracy ±0.5% and dial reading of 90°, it is recommended that the angle finder is attached to a steel rule or square by means of the magnet or screws for optimum levels of accuracy.
