DATA SHEET

Plain Washer Kit - Metric

These plain steel metric washers are the ideal product for effectively spreading a load evenly around a fastener, to avoid the fastener succumbing to pressure or strain. With approximately 1,500 pieces, the set includes M5, M6, M8, M10 and M12 sizes to ensure you have the right size to hand. Finished with an electroplated BZP and supplied in a hardy plastic box.

Features and Benefits

- Simple yet effective way of spreading a load across a surface evenly without putting a fastener under stress
- Bright Zinc Plating (BZP) finish provides additional protection against corrosion and weathering
- Steel construction is resilient and provides product longevity
- Supplied in a robust plastic box for ease of storage

Typical Applications

- Construction
- Automotive
- Engineering
