DATA SHEET

Product Code: KEN8837020K
Brand : Kennedy

Euro-Torch Lining Blue 4mtr -0.6-0.9mm

Product Information :

A blocked MIG torch lining can very often be the cause of annoying wire feed problems with your machine. Copper particles from the coating of the MIG wire, surface rust and general workshop dust can soon cause blockages and start to cause problematic wire feed. Purchasing and replacing your torch liner regularly combats this problem and ensures a smooth operation. Available in a range of specifications to suit your needs, the products are suited for use with steel wire.

Features and Benefits
- Inexpensive and easy to fit, the liner should be replaced periodically to ensure a smooth wire feed
- Fully compatible with most Binzel® style Euro-Torches
- Available in a variety of specifications to suit your needs
- PVC coating is hard wearing and highly protective

Typical Applications
- MIG Welding

EAN Code - 5036140044234
