Product Description

KleenGuard® Personal Protective Equipment (PPE) enables rather than inhibits – allowing for maximum productivity and safety for you and your employees. When you need a thin working glove to help protect without sacrificing productivity, KleenGuard® G10 Flex™ blue nitrile gloves are a great choice. Due to their 0.08 mm finger thickness, these tactile gloves help enhance productivity by enabling workers to feel the shape and texture of objects while performing light-duty tasks. Thanks to the smart design, these ambidextrous, touch screen compatible, highly disposable gloves help increase speed and accuracy whilst providing excellent fit. The textured fingertips of the touch screen gloves give employees a grippable surface for dexterity while performing sensitive tasks. The beaded cuff helps prevent roll-down and makes the precision gloves easier to don. The tactile gloves' synthetic nitrile rubber material provides extra resistance and durability when compared with latex, making them the ideal choice for hand protection, plus reducing the potential for Type 1 PPE glove associated reactions. These safety gloves are also powder free, minimising the drying effect of powder on skin and helping to avoid skin allergies and reducing the risk of contamination. Ideal for light-duty tasks and with an ambidextrous design, KleenGuard® G10 nitrile gloves are perfectly suited for any user and come in a portable dispenser box for mobility and easy access. KleenGuard® G10 Flex™ blue nitrile gloves are AQL 1.5 (defined according to ISO 2859-1) and available in a variety of sizes from XS to XL; for other glove sizes, see product codes 54331, 54332, 54334, 54335. Nitrile glove size 0.08 mm (thick) x 24 cm (L). These blue nitrile gloves are a leading choice across a variety of industries such as painting, automotive and small parts handling, precision electronic assembly, manufacturing and food service because they are comfortable to wear, provide excellent tactile sensitivity, deliver reliable protection for the task at hand and offer improved cost-in-use. Making the right Personal Protection choice is difficult. Perform with distinction with KleenGuard® Personal Protective Equipment (PPE). 10 Boxes x 100 Blue, M, PPE Gloves (1,000 Total)Kimberly-Clark Professional™ personal protective equipment is only intended for occupational workplace use and must be used in compliance with all applicable health and safety laws and standards in addition to all user instructions, warnings and limitations accompanying each product. It is essential all product user instructions and laws and regulations on the use of each product be followed in order for the product to help protect the wearer. Misuse of personal protective equipment may result in injury, sickness, or death. For correct product selection and use, individuals should seek occupational health and safety advice from a suitably competent person. This product is suitable for sale in the EU.
