DATA SHEET

FASTROD™ Welding Rods - 3.2mm (Dia) x 350mm (Length)

E6013

This range of general purpose electrodes are ideal for welding both mild and medium tensile steels. With an easy-striking action, each product has the ability to hold a stable arc with self-releasing slag for excellent shape and finish of the weld seam.

Features and Benefits

- Can be used in all positional welding making them highly versatile
- Operational with both AC and DC power sources
- Available in a host of diameters depending on your requirements
- Rutile coating encourages smooth arc ignition and operation to ensure a neat join
- Weight: 5Kg

Typical Applications

- Ideal for producing quality welds and joins on medium tensile steels, mild steel tubes, pipes plate and sheet metal work

Standards

- Lloyds Certificate **BGK0610002/01**
- Lloyds Certificate **BGK0610002/02**
- Lloyds Certificate **MATS/THA-1002/12/1**
- ABS Certificate **BG575520-X3**
- ABS Certificate **BG575520-X2**
- ABS Certificate **BG575520**
