HOBBES LANtest Multinetwork PoE Kabeltester

HOBBES LANtest Multinetwork Testeur de câble + PoE

HOBBES LANtest Multinetwork Cable Tester

Item no.: 13.01.3371
Multi-Network POE Cable Tester, dark grey

Features:

- Check the existence of POE in a second
- Identifies the type of PSE, whether the POE voltage is detected on the pair 12-36 (Endspan), or on the 45-78 (Midspan)
- Compliant with IEEE802.3af and IEEE802.3at standard
- Wiring configuration for Cat5, coaxial and modular telephone cables by comparing one transmitting end to another receiving end
- Easy verification for cabling faults including discontinuity, open wires, shorts, miswiring and crossed pairs is quickly detected with LED display
- Power Source: 9V DC battery
- Power consumption: 22mA
- Operating Temperature: 0° to 50℃
- Storage Temperature: -10° to 60℃
