starmix 497

Order No.: 103686

(old Order.No. 101019 & 100289)

Equipment & Application

- **Turbo sweeping system = Sweeping twice in on step:** The disc brush system is extended with a fine-dirty brush behind it.
  This allows these machines to effectively sweep twice in one step. Even the most fine debris is collected.
- **iSweep**: Thanks to the new form-fitting constructrion and the use of new self-lubricanting sliding materials the rellabaility and durabilityof the clutch will be increased significantly → dirt resistant, mainten-ance-free, robust and durable.
- The **lateral guide rollers** makes sweeping close to the edge possible and allows sweeping along kerbstones or walls und protect this areas and the machine
- The protruding plate brushes and the **adjustable brush downholder** makes sweeping in every corner possible.
- **Brush height adjustment**: infinitely variable for optimal sweeping on various grounds such as asphalt, concrete, slaps or for damp leaves, sand, uneven surfaces.
- The ergonomic push handle can be adjusted up or down without the use of tools
- **Dust reduced sweeping due to two special filters:** 2 special filters and flexible sealing lips reduce dust emission
- Space-saving storage in upright position
- High-quality and long-lasting disc brushes:
  4 years warranty on brush wear

Technical data

Working principle	Turbo sweeping system 2 disc brushes & 1 fine dirt roller brush
Brush drive	Manual
Sweeping width	97 cm
Dirt container capacity (max.)	40 liters
Sweeping performance	3.500 m²/h
Weight	15,7 kg

Application areas

For frequent professional sweeping operations for large areas up to 3.500 m² .

Property Management, cleaning companies, petrol stations, workshops, car parks, courtyards, warehouses and production halls.
