U 408

Sphered seat washers

Sphered seat washers are used together with thrust ball bearings with sphered housing washers when the bearing is fitted into a machine component manufactured with a flat surface. The seat washers are supplied as separate components. Depending on bearing series, they have the basic designation U 2, U 3 or U 4 followed by a two-digit number, which identifies the size, e.g. sphered seat washer U 320 for bearing 53320.

- Enable the bearings to accommodate initial misalignment
- Can be used with single or double direction bearings
- Enable full interchangeability of seat washers

FEEDBACK

Product information

Dimensions

Bore diameter	65 mm
Outside diameter	95 mm
Height	12 mm

Properties

Material	Bearing steel
Coating	Without
Indicative product carbon footprint to manufacture	0.9 kg CO₂e

Logistics

EAN code	07316570744361
Pack code	12
Products per pack	1
Collecting pack quantity	5
Products per pallet	525
Pack gross weight	0.264 kg
Pack length	104 mm
Pack height	106 mm
Pack width	25 mm
Pack volume	0.276 dm^3
Product net weight	0.25 kg
eClass code	23-05-10-01
UNSPSC code	31171507
