

Suction pad holder/receiver

Product code: Pad01

Overview

The suction pad holder/receiver is designed for use with the Skipper XS unit (although it can be used as a standard tape receiver). It can connect to high gloss surfaces and glass. The suction pad can then either hold the Skipper XS unit in place or be used to receive the tape end clip.

Product Specifications

Width: 117mm	**Height: 45mm**
Depth: 78mm	**Weight: 65g**

Key selling points

- Holds the Skipper XS unit via its connector points or receives any Skipper tape end clip
- Perfect for attaching to high gloss surfaces and glass

Key features

- Has a suction cup which provides a strong attachment to high gloss surfaces/glass
- Very easy to attach and release via it's handle, which also acts as a receiver.

The suction pad can hold the Skipper XS unit, or receive any Skipper tape end clip

Product FAQs

Q. How strong is the suction cup?

A. The suction cup provides a very strong attachment to high gloss surfaces and glass, and is therefore more than secure enough to hold the Skipper XS unit in place and pull out its tape.

Q. Is there a risk of damaging surfaces?

A. The suction pad holder/receiver is safe to use on high gloss surfaces and glass It may leave marks on glass, which will wipe off easily. It is very important, however, to release the handle fully before removing from a surface. We strongly recommended that you do not use the suction pad holder/receiver on painted surfaces, as this could cause damage on removal.
