

PRIMEX
ABRASIVES' SIGNATURE

GW850 **AIRMEX**

High performance ceramic mesh

self-grip

APPLICATIONS

- Hand sanding or machine sanding.
- For sanding any surface, but especially recommended for sanding soft materials which raise lot of dust like painting, plasters, coats or wood.
- Thanks to ceramic grain, efficient on tough surfaces.
- Dry sanding.

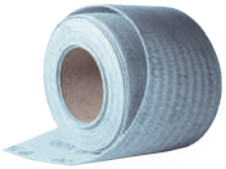

ADVANTAGES

- Very open mesh which make dust suction very efficient on all the surface of the disc or cut-sheet.
- The design and composition of GW850 **AIRMEX** give it flexibility (the mesh doesn't break) and stiffness (the mesh doesn't warp).
- The mesh is designed to reduce the heating while sanding.
- Very long-lasting. The ceramic grain keeps its cut-power as long as abrasive's use.

TECHNICAL DATA

- Backing: **polyamide mesh + layer of self-gripping**
- Bonding: **resin**
- Grain: **ceramic**
- Coating: **open**
- Grit: **P80, P100, P120, P150, P180, P240, P320, P400,**
- Usual finish: **self-grip**
