# Alligator clips

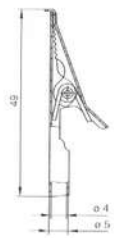

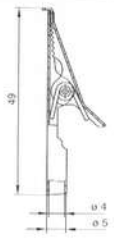

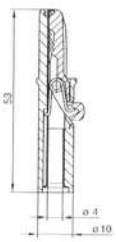

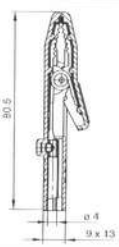

*Product description*

Alligator clips, also known as crocodile clips, are outstandingly suitable for the testing and transfer of currents.
The sharp teeth of the clips bite into the test specimen with little contact resistance.
Thanks to their thin wire clamping capability, they are able to make contact with extra finely stranded conductors of minimal cross sections.
Opening widths up to 30 mm permit large contacts to be securely gripped.

The MICRO-SMD CLIP is used for the two-pole testing of very small SMD components.
Crocodile clips are also widely used in non-electrical applications.

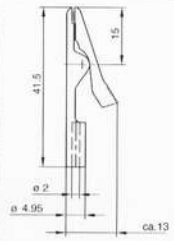

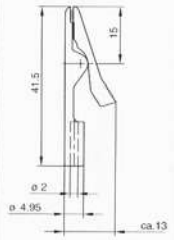

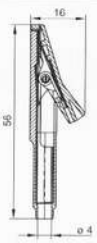

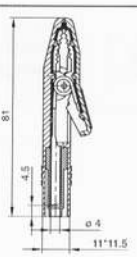

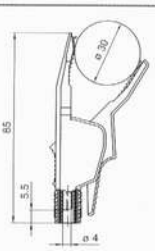

| *System<br>Article type | | Technical Data | **Order no.<br>Colour** |
|---|---|---|---|
| (64)<br><br>MICRO-SMD CLIP 1 |  | 2-pole test clip, clamping range 0 up to 8 mm | **972 416-100** |
| <br>AGF 1 |  | Solder contact | **930 476-001** |
