NEW PSS COMPACT BAG

The PSS Compact Bag is a new concept for storing tools in a quick, easy and more organized way. The PSS Compact Bag is fitted with patented PSS (Professional Storage System) systems. The tools are stored and held in place thanks to the pressure of four rubber blades. The design is lightweight, made using an injection moulded technique that makes both the storage housing and the blades highly elastic and resistant to rough, heavy duty use with no memory effect. Ideal for hand tools of all sizes, is a great advantage of facilitating fast tool change during service.
