TOOL BAG

12 internal storage compartments

Compact and well-organized

The flap opens fully, providing immediate access to the central compartment and interior storage areas. A flat front pocket is designed for small documents. Slip your job sheets or RDA into it. Inside the main compartment: 6 cartridge holders to keep each of your hand tools securely in place.

Quickly - accessible tools

With its hook-and-loop fastener, the flap opens and closes quickly and easily. Under the flap, a gusseted front pocket allows for storing small tools. On each side, a closable pocket with hook-and-loop fastening is ideal for isolating a torch or a grease tube.

Practical to carry

The central handle lets you quickly grab your closed CO3 bag.The shoulder strap allows for hands-free carrying.

Optional

Add a hook-and-loop system: ideal for working at height — the shoulder strap converts into a belt for secure and practical carrying.

New

With the new 100% polypropylene cover, our tool bags are now 95% recyclable.
