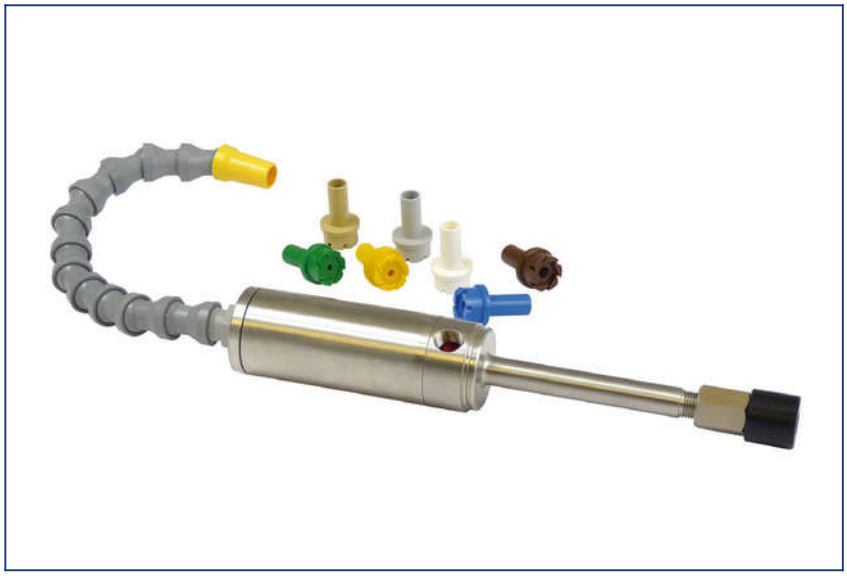
Experimental Kit



Product Code: A20300

The Meech Experimental Kit incorporates a Meech Vortex Tube with a Cold End Silencer and a length of flexible knuckle trunking which can be used to direct the cold air flow. The Experimental Kit also includes all 8 generators, that allows for the most flexible temperature and air consumption, perfect for application that require changing cold air temperature.

Features

Benefits

Features	Benefits
No moving parts	Low maintenance
Available in 2 sizes	Suitable for a range of applications
Runs only on compressed air	No electricity costs
Stainless steel construction	Hard wearing

Technical Characteristics

Compact and lightweight	Overall length - Medium 272mm Overall length - Small 239mm
Versatile temperature control	Supplied with all 8 generators
Directional cold air flow	Knuckle trunking provided
Reduced noise operation	Silencer provided
