Hand-Held Plastic Enclosures w/ EMI/ RFI Shielding *1599RFI Series*

Molded w/ Conductive Plastic

RoHS

Features:

- Designed for EMI/RFI shielding applications - using conductive plastic (a compound of plastic and stainless steel fibers).
- Attractively styled and ergonomically designed for use as a handheld instrument enclosure.
- Molded from a compound of stainless steel fibers and flame retardant ABS plastic (material carries a UL flammability rating of 94V-0).
- Lap joint construction provides protection against dust accumulation and splashing water.
- Extra deep top and ultra shallow base are specifically designed to enhance the aesthetics of the enclosure and provide the user with flexibility and assembly efficiency.
- Designed to meet IP54.
- NOTE: Material is brittle - acts like phenolic - NOT FOR HIGH IMPACT USE.
- Lid is secured with Philips machine screws, threaded into tapped integral brass bushings. Perfect for applications with repetitive assembly and disassembly are required.
- For non-shielded applications, try series **1599**
- 50 pack of optional PC board screws (#4 x 1/4" Self-Tapping), part number **1593ATS50**

SAFETY NOTES:

- Conductive plastic is NOT an insulator - these enclosures must be treated like a metal enclosure.
- Conductive plastic will act as a heating element - any significant current flow will cause the plastic to heat and produce smoke.
