Italtronic Srl. & Hitaltech

Italtronic Srl. based in Padova, Italy design and manufacture an innovative range of plastic enclosures to meet the needs of electronic and electrical applications across varying industries.

Hitaltech are pleased to be the apppointed technical sales, marketing and master distributor for the UK & Ireland and US Market.

Through our knowledge and experience of the product Hitaltech aim to offer design engineers an Italtronic product which can meet their technical requirements.

The **Modulbox XT/XTS** is a DIN (EN 60715) mounting enclosure which has been designed according to DIN 43880 to meet the needs of a number of applications including heating & lighting control and energy metering.

Through a concept of flexible tooling all sides of the Modulbox XT can be customised.

2 to 12 Modules of this DIN Rail mounting enclosure are available in a standard height of 53mm.

Many customisation options are available which aim to meet any design challenge, including machining and/or machining of the enclosure & accessories to meet customer specific demands.

MODULBOX XT MODULBOX XTS
Contenitori per strumentazione elettronica agganciabili su guida DIN (EN 60715) secondo norme DIN 43880

Materiale: Blend PC/ABS autoestinguente UL94-VO
Colore: Grigio RAL 7035
Misure: 2M, 3M, 4M, 5M, 6M, 8M, 9M, 12M

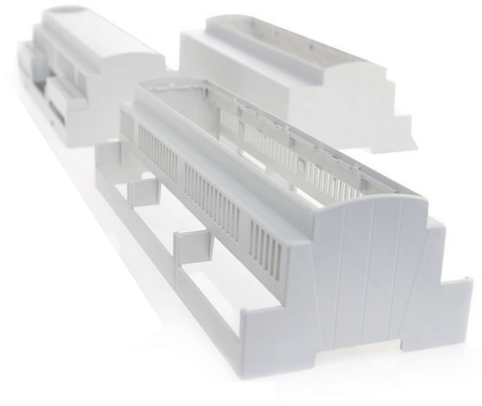

CARATTERISTICHE
Contenitore modulare da 2 a 12 moduli per strumentazione elettronica agganciabili su guida DIN (EN 60715). Pratico per la facilità di aggancio delle schede e per il montaggio del contenitore senza viti, MODULBOX XT - MODULBOX XTS si caratterizza per la vasta e completa gamma di combinazioni possibili che soddisfano le esigenze più particolari e specifiche della clientela. Diverse grandezze modulari e all'interno di queste più versioni disponibili, diversificata gamma di pannelli frontali, lavorazioni e serigrafie, chiusure particolari, sportelli di protezione piombabili, coprimorsetti e morsetti specifici: una molteplicità di opzioni e possibilità che soddisferanno ogni vostra esigenza e renderanno l'aspetto del vostro prodotto unico e personalizzato.

DIN Rail (EN 60715) mounting enclosures for electronic products according to DIN 43880

Material: Self extinguishing Blend PC/ABS UL94-VO
Colour: Grey RAL 7035
Dimensions: 2M, 3M, 4M, 5M, 6M, 8M, 9M, 12M

FEATURES
MODULBOX is a DIN (EN 60715) mounting enclosure (modules from 2 up to 12) for electronic products. MODULBOX XT - MODULBOX XTS enclosures offer a wide range of matching options and possibilities which may satisfy any particular or specific Customers' need giving to the product a unique and personalized shape. They are characterized by the possibility to mount the enclosure itself without screws, by a great variety of modular sizes, diverse range of front panels, machining and silk-printing processes, specific panels, lead sealed protection panels, terminal covers and specific terminals.

CIRCUITI STAMPATI

Le esigenze dei Clienti sono numerose, perché molteplici sono i Clienti ed ognuno ha le proprie necessità. Italtronic ha fatto esperienza di questa evidenza del mercato ed ha trasformato la necessità di offrire una vasta gamma di prodotti in virtù. Proponiamo oggi infatti la gamma più completa in grado di soddisfare le esigenze più particolari dei nostri Clienti. Il contenitore modulare (da 2 a 12 moduli) è solo la base per la realizzazione di una innumerevole varietà di esecuzioni. Dietro al contenitore c'è un mondo di pannelli, chiusure, sistemi di aggancio, lavorazioni e serigrafie che renderanno l'aspetto del vostro prodotto unico così come unico e riconoscibile deve essere il vostro stile.

PRINTED CIRCUIT BOARDS

Customer demands are high due to the large number of customers: each with their own needs. Italtronic is aware of this market demand and now offers the widest range of products to meet the requirements of the most discerning customers. The modular enclosure (from 2 to 12 modules) is just a base on which Italtronic can insert a wide range of components. Making an enclosure involves many panels, terminal covers, fastening elements, machining and silk-screen printing processes, which make your product unique, just like your recognizable style.

MODULBOX XTS

MODULBOX XT MODULBOX XTS
ITALTRONIC si avvicina alle esigenze del cliente.

I contenitori della serie MODULBOX XT/XTS sono stampati impiegando stampi speciai sviluppati estremizzando al massimo il concetto di MODULARITÀ, che prevede la suddivisione nel maggior numero possibile lo stampo per iniezione plastica anzichè la normale suddivisione in due parti di cui un matrice e un maschio. Ciò permette ad ITALTRONIC una maggiore flessibilità ed adattamento alle richieste della clientela perchè può integrare e soddisfare meglio le necessità particolari di ogni cliente direttamente nello stampo per la produzione finale.

MODULBOX XT MODULBOX XTS
ITALTRONIC is close to customer needs.

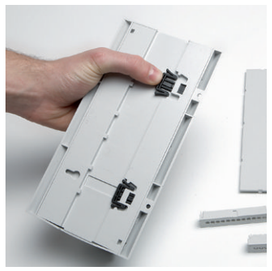

The MODULBOX XT/XTS series enclosures are printed using special moulds developed to fully exploit the concept of modularity, allowing the plastic injection mould to be divided into as many parts possible instead of the usual two parts comprising a matrix and male. This gives ITALTRONIC more flexibility because it can integrate and better meet the needs of each customer directly in the mould for end products.

PIOMBATURA

Il prodotto MODULBOX XT - MODULBOX XTS è stato realizzato in modo da permettere con estrema facilità l'operazione di piombatura. Tale operazione consente di piombare tra loro la base ed il corpo contenitore. Per eseguire tale operazione non è necessario alcun componente aggiuntivo, essendo presenti sia sul corpo contenitore sia sulla base, dei fori appositamente predisposti.

SEALING

The product MODULBOX XT - MODULBOX XTS has been designed to allow easy sealing. Such a process allows the base and the body of the enclosure to be sealed together. In this processing, there is no need of additional components because some holes are present either on the base or on the body enclosure.

MODULBOX XTS

DIN rail (EN60715) mounting enclosures for electronic products according to DIN 43880

Material: Self extinguishing Blend PC/ABS
Colour: Grey RAL 7035

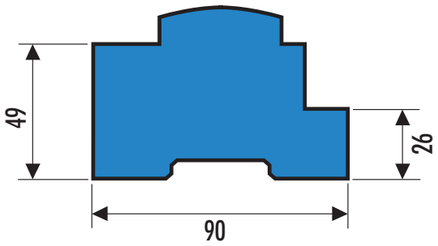

FEATURES

This modular enclosure can be fastened to DIN (EN 60715) rail and can be provided with several terminal covers and various front panels. There are several versions of this modular enclosure: Type A (similar to the previous Modulbox product and bearing the same compatibility with the pcbs), type B (with one side higher to leave more space for larger electronic components) and type C (with both sides higher to have more space for the electronic components).

H53-B

Picture is an example of B version
(picture shown is 25.0206000.BL)

This type has one side higher to allow electronic components of bigger volume. It has been designed to allow the snap-in lock assembling of three different printed circuit boards (CSA, CSB e CSC).
H53: the standard version of type B is H53. This version maintains the possibility to assemble panels and terminal covers on one side only of the enclosure. Its side, next to the assembling area of the terminal blocks, is high.
It is possible to have special versions upon requests for a relatively low order quantity.

Part	Description
25.1206000.BL	COMPLETE ENCLOSURE MODULBOX XTS 12MH53-B (Includes, DIN Rail Hook)
Optional Accessories (purchased separately) are listed below:
