

W201 (UK)

Item No: T0056105399N
Line voltage soldering iron 200 W

The Weller Magnastat system operates through a ferro-magnetic sensing device which changes its characteristics when specific temperatures are reached. This causes it to either attract or repel a permanent magnet which operates a power supply switch. In this way power to the heating element can be quickly switched on or off to either provide extra power for soldering operations or reduce power when idling. Various pre-selected tip temperatures are available to permit different types of soldering to be undertaken. Working temperature selection is achieved by simply changing the ";temperature sensing"; soldering tip. These are available in temperature ratings of 260°C, 310°C, 370°C, 425°C and 480°C.

KEY FEATURES

- 200 W, 230 V
- Complete with soldering tip CT2 F7 and safety rest
- Magnastat controlled
- For CT Soldering tips

TECHNICAL DATA

ESD Safe	Yes
Magnastat	Yes
Power	200 W
Temperature Range (Depends on Tool)	370°C
Tip Type	CT2 CT6 HM LT PT
UPC	4003019008391
Product Family	Mains-Powered Soldering Irons
