Key Features and Benefits

The latest LTL Acorn 'Trail Cam' range comes with a host of new features including blue invisible 940-IR and the useful SD Cycle Function. The SD cycle function allows the LTL6210 cameras to be kept in the field for longer by overwriting the oldest videos and images, when the SD card is full.

There are two different models in the range the LTL6210A is a non GSM unit, which will record all activity straight to the SD card (up to 16GB). While the LTL6210MM trail camera includes GSM and will send images via email, MMS and SMTP. This provides you with the ability to decide on the settings that best fit your needs. The GSM settings can be easily edited and can be programmed with the supplied software.

The compact Trail Camera is supplied in a camouflaged housing and boasts some impressive features: 3+ months battery life (in standby), Sensor and IR vision range 45 ft. Programmable 5 or 12 MegaPixel, DVD quality video (640 x 480), Time & Date Stamped, Security Code.

With three angled sensors it is possible to prime the unit to give a 1 second trigger. Time lapse record is another new feature enabling continuous recording over a period of time. These models allow playback of video and viewing of snapshots through large LCD at the unit's base.

This camera can be used for a variety of applications and is ideal for allotment and garden security and void properties.
