Surefoot™ Anti-trip Barrier Foot - Yellow

High density anti-trip feet for your JSP barrier. These anti-trip feet from JSP are scalloped in design to help prevent pedestrian and worker accidents. The Surefoot™ Anti-trip is made as one piece meaning that it is one of the strongest anti-trip foot options on the market, unlike other brands which can be made from multiple parts which can compromise on strength.

Features & Benefits

Anti-trip
Reduce chance of accident by implementing anti-trip feet in high traffic areas such as pavements.

Strong
High density one piece foot greatly reducing replacement feet.

Cost effective

Without need to replace barrier feet you greatly increase the cost effectiveness of your barriers.
