CLEANING CLOTH

To catch dust

APPLICATIONS

- A real dust «sponge», the PROCHIM wiping pad is intended to remove particles from surfaces that are harmful to the final treatment.
- Can be used on all types of supports and in particular on wood, metals, plastics, etc.
- Very useful for body work in the automotive, aeronautical and railway industries.
- For dry cleaning of primers and varnishes after sanding.
- Dry use.

ADVANTAGES

- Absorbs dust (does not move it) thanks to the adhesive resin that impregnates the pad.
- Migration of dust within the wiping pad thanks to the perforated structure of the fabric.
- Don't grease.
- Always flexible.
- Does not air dry.

SECURITY DATA

The substance is classified as non-hazardous. (Classification in accordance with Regulation (EC) No 1272/2008).

This product is not labelled under REACH as it is considered to be an article.

Indications particulières concernant les dangers :

Information concerning particular hazards :

- Health hazards: if dust is generated, it may be abrasive to the eyes and cause minor irritation to the respiratory tract. Vapours or fumes released when the product is heated may cause respiratory tract irritation.
- Environmental hazards: no significant hazard. The product does not meet the PBT or vPvB criteria in accordance with Annex XIII of REACH.
- Physical/chemical hazards: contact with hot product may cause thermal burns leading to irreversible damage. WARNING: May form combustible dust concentrations in air (during processing/handling). The product may accumulate static charges that could cause ignition. Granules spread over a hard surface represent a slipping hazard.

TECHNICAL DATA

- Backing : **cotton gauze**
- Coating : **natural resin adhesive**
