GEARWRENCH

10 Piece 120XP™ Universal Spline XL Flex Head GearBox™ Ratcheting Metric Wrench Set

86126

Available at

RS Components

GEARWRENCH has redefined performance with the 120XP™ ratcheting wrenches, all of which have 120 unique ratcheting positions and a 3 degree swing arc. These ratcheting wrenches provide the best access possible and feature a tighter swing arc, a longer beam, a reduced diameter ratcheting box-end, and a slim line open-end design.

FEATURES

- 120XP™ wrenches have two double stacked 60-tooth pawls (120 positions) providing a 3° swing arc so you can turn fasteners in tighter confines
- Universal spline drive fits 12-point, 6-point, rounded 6-point, spline, Eternal Torx® and square fasteners
- XL beam design is up to 25% longer than standard wrenches for improved reach, leverage, and torque
- Off-corner loading design on box end provides better grip and reduces fastener rounding
- Highly visible, recessed size markings are color coded for easy identification
- Manufactured from alloy steel for better strength and longer tool life
- Flexible head provides access to hard-to-reach bolts and fasteners
- 0° offset on non-ratcheting end for breaking loose stubborn fasteners
- Bright, full polish chrome finish easily wipes clean and resists rust and corrosion

SME Specification :	B107.6
