Locking device for RCCB's

For securing single- or multi-pole RCCB's against unauthorized switching on or off.
For padlock with hasp diameter max. 4 mm and lock width max. 17 mm.

Application:

Locking against switching on:
- Locking against undesired switching on during maintenance work
- Locking with commissioning notice
- Locking when supply is being blocked

Locking against switching off:
- Prevention of unwanted manual switching off, e.g. of Alarm, air conditioning, computer installations etc.
- Reclosing after tripping only allowed by authorised persons.
