# Introduction

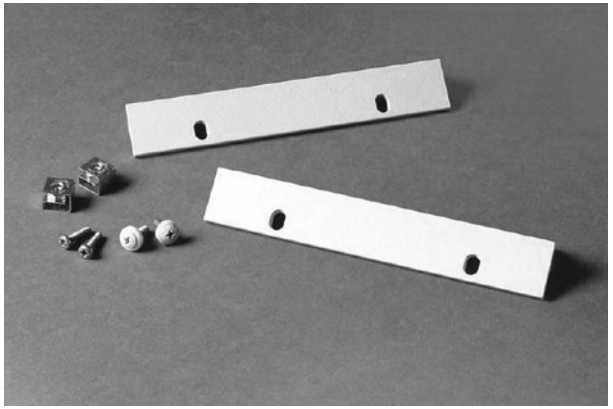

Rackmount accessory products provide rackmount accessory solutions for your Keysight Technologies, Inc. instrument assets. These accessory products are being released in two waves, starting in May, 2011. These products are offered for standalone sales, and qualify for standard discounts. The *Keysight Rackmount Accessory Cross Reference Selection Guide* is designed to assist you in selecting the correct product to meet your needs. Simply identify the instrument needing the rackmount accessory, then look in the column corresponding to the type of accessory needed to find the accessory product number to order. Additional information is provided to help identify the correct item including the original instrument option for the accessory, the part number of the key component making up the accessory, and the accessory description. Keysight will be adding additional rackmount accessory products to broaden coverage to more instruments and more mounting options in the near future.

# 1CN Series Handles

## Add handles to your Keysight products for easier maneuvering and lifting

Order a front handle kit when your instrument does not come with pre-installed handles. Check to make sure your instrument requires handles, as many instruments are supplied with previously installed handles.

- Flanges attach to pre-existing holes in the instrument case.
- A plastic trim strip is easily removed and the handle or flange attaches with screws supplied in the kit.
- Before rack mounting, bottom feet must be removed.

| Instrument module height | Front handle kit (order new product if available) | New handle product (currently available, if populated) |
