Wireless Alert
Quick Start Guide

Thank you for purchasing a **FilesThruTheAir** Wireless Alert. Follow these steps to get started.

1. Install the FilesThruTheAir app, available on the App Store, or on Google Play.

Download on the App Store

GET IT ON Google Play

GET THE APP HERE

2. Start the app, click **TAP TO GET STARTED**, then **CONNECT A NEW WIRELESS ALERT**.

3. Follow the in-app instructions to set up your Wireless Alert.

Safety Information

Refer to the FilesThruTheAir app for safety and legal information. Corintech Ltd. declares that this wireless device is in compliance with Directive 2014/53/EU. The complete EU Declaration of Conformity is available at www.filesthrutheair.com/support

The Wireless Alert Range

Wireless Alert is our most affordable range of Wi-Fi connected sensors. The products in this range send a warning email when user-set conditions are met. Simply select your settings, enter a contact email and connect to your Wi-Fi network using the FilesThruTheAir mobile app.

Wireless Alert TP

Using an external probe to measure temperature between **-40 °C and +125 °C**, Wireless Alert TP is ideal for fridge and freezer monitoring.

Wireless Alert T

With a built-in sensor that can measure temperature between **-18 °C and +54 °C**, Wireless Alert T can be used to monitor indoor spaces for a variety of applications.

Wireless Alert TH

With a built-in sensor that can measure temperature between **-18 °C and +54 °C** and humidity between **10 %RH and 90 %RH**, Wireless Alert TH can give confidence that indoor spaces are damp-free and comfortable.

Wireless Alert DC

Receive an alert when a door is opened, closed, or both. You can also use alert delays in order to ensure you only receive alerts for genuine events, or monitor for absence of activity.
