Universal Tensioner series TE

RESATEC® universal rubber tensioners type TE are used throughout the mechanical engineering and allied industries.

Mainly used as belt and chain tensioners they are simply fitted by a single rear mounted bolt and hold in any position by friction. A base flange cutout allows them to be accurately aligned using a simple spigot. They can be supplied with a lead and cadmium free powder-coated finish.

RESATEC® TE tensioners are safe in operation and maintenance- free.
