SATA DATA CABLES
Internal / External SATA Data Cables

SATA revision 3 doubles the speed of the current 3GB/s version reaching transfer speeds of 6GB/s
The speed ratings of the different versions of Serial ATA are;

• SATA Revision 1- 1.5GB/s • SATA Revision 2- 3GB/s • SATA Revision 3- 6GB/s
The different versions of SATA are backwards compatible.

SATA connectors come in two shapes SATA and eSATA. Both types work in the same way with the eSATA connector intended to be used on external devices.

Serial ATA Revision 2 - 3GB/S
