Weathersafe

IP66 1g 2w 20AX Press Switch with Neon

Description

Weathersafe has been designed to withstand the toughest outdoor and demanding environments, combining reliability and long-lasting performance with a sleek black finish. Rated IP66 and manufactured from impact-resistant polycarbonate ensures the product endures harsh conditions, making it an ideal solution for gardens, patios, and workshops.

This 1 gang 2 way switch is 20AX rated with a neon indicator as a status indicator or a locating light, and has captive and backed out terminals with large cable lead-ins and clear markings. The large "PRESS" marked switch allows easy operation.

Installation is quick and effortless. Fast-fix captive screws allow the detachable back box to be removed with ease, while mounting points are separated from the main wiring space minimising the need for weatherproof sealant to reinstate IP66 rating.

Features

- IP66 rated protects against dust and powerful water jets, ideal for tough indoor and outdoor environments.
- Press switch ideal for use with doorbells or door releases
- Captive and backed out terminals with large cable lead-ins and clear markings
- Dual-function neon indicator for use as a status indicator or a locating light.
- Grey impact resistant polycarbonate housing
- Fast fix screws allows accessory frame to be quickly installed and removed
- Back box mounting points separated from main wiring space to maintain IP rating
- Multiple drill out cable entry points on all sides and rear of back box

Product Code

IP66 1g 2w 20AX Press Switch with Neon	TW1226

Technical Specification

- **Input Voltage** - 220-240VAC, 50/60Hz
- **Maximum Load** - 4800W, 20AX
- **Material** - Polycarbonate
- **IP Rating** - IP66
- **Terminal Capacity** - 2 x 2.5mm², 4 x 1.5mm²
- **Overall Outer Dimensions (W x H x D)** - 90 x 90 x 66mm

Compliance

- BS 60669-1
- BS EN 60529

Guarantee

- 10-year guarantee
