# Treston SAPEL electrically height adjustable work trolley, 2

Electrically height-adjustable SAPEL trolley is designed to safely, easily and ergonomically move heavy, delicate or difficult-to-handle items between workstations. During transport, SAPEL can be adjusted to an ergonomically optimal height to improve comfort and reduce strain. When positioned next to selected compatible Treston workstations, SAPEL can be adjusted to the same height for smooth sliding of items between surfaces. SAPEL also works as an additional work surface that can be adjusted to a desired height for ergonomic working, for example when picking components, tools or materials for the workstation. The compatible battery set BSC001 for the trolley must be ordered separately. SAPEL can be equipped with steel edges for the top surface, a handle and a lower shelf. See also the SAPEL 4-legged version with higher load capacity.
