PRF
EMC screen with integral contact protection guard
The EMC screen combines RFI screening with contact protection. They are designed to fit directly over a compact fan with minimal reduction in airflow or increase in fan noise. The design features a welded mesh wire construction of thin wire which results in an EMC attenuation, with only a few percentage reduction in airflow.

- One piece steel construction
- Welded mesh for high screening properties
- Minimal obstruction to airflow
- Negligible increase in fan noise
- Utilities same fixing holes of the fan

Part number	Fan size (mm²)	A (mm)	B (mm)	C (mm)	D (mm)
PRF40	40	45	45	32	4
PRF60	60	65	65	50	5
PRF80	80	85	85	71.5	5
PRF90	90	95	95	82.5	5
PRF120	119	124	124	104.8	5
