ENCLOSURE CASE
E005/001 to E005/006
TECHNICAL SPECIFICATION

Product Overview:-

General purpose enclosure case manufactured from aluminium extrusion section with a removable top cover to allow easy access for assembly and installation of component parts.

Specifically developed to offer a stlyish yet robust off the shelf item within which to mount electronic circuitry and components.

The external surface of the enclosure incorparates a series of ribbed fins to aid heat dissipation, T slots have been provided on both the side and base of the enclosure proving mounting facilities.

Multi-position PCB slots have been provided inside of the enclosure case and will except eurocard size PCBs.

The enclosure case is supplied complete with 2 x 1.5mm aluminium end plates and stainless steel fixing screws.

Models Availiable :-

Part number	Length (mm)	Width (mm)	Height (mm)	Material	Finish
E005/001	100	105	60.5	Aluminium	Black Anodize
E005/002	125	105	60.5	Aluminium	Black Anodize
E005/003	165	105	60.5	Aluminium	Black Anodize
E005/004	200	105	60.5	Aluminium	Black Anodize
E005/005	225	105	60.5	Aluminium	Black Anodize
E005/006	285	105	60.5	Aluminium	Black Anodize

Options Availiable :-

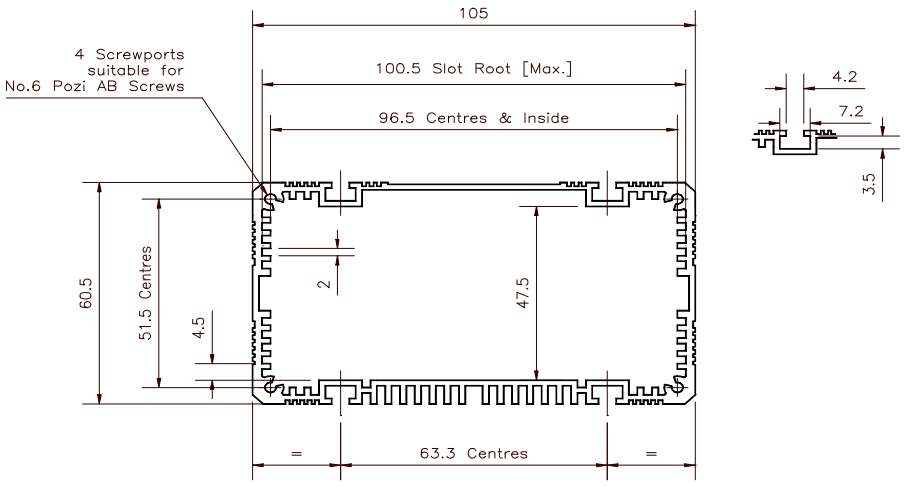

Mounting Kit:- E007/001
Enclosure Case mounting kit consisting of 2 brackets and mounting screws

Gasket Kit:- E007/002
End Panel Gasket Kit consisting of 2 closed cell neoprene gaskets

***Specials*:-**
The Enclosure case can be supplied in alternative lengths and finishes

In House Maching Services:-
Customised machined features such as holes,slots, cutouts and apertures can be added to the enclosure cases/endplates to match customers requirements.
