Beware of wire ends flying off!

General Information

Plastic Pipe and Hose Cutters
The optimised geometrical shape of the cutters enables distortion-free cuts through plastic pipes and hoses. This is not just due to the shape of the cutting edges - the transmission of muscle force to the cutters is crucial.

Connecting to the future
Solar energy is a clean alternative source of electricity. To make sure it is also a safe source, junction box and switch cabinet wiring has to be properly stripped, crimped and connected up. Using NWS wire stripping and crimping tools, electricians can handle wires and cables in line with all the applicable regulations and down to the millimetre. In this way, whether private houses, factory roofs or photovoltaic installations, they all become clean and safe players in the transition to renewable energy sources.
