Dyflex® Plus N

Dyflex® Plus N is a lightweight seamless knitted high cut resistant liner with a foamed nitrile coating and thumb crotch reinforcement. The remarkably lightweight and breathable high performance liner provides maximum levels of cut, abrasion and tear resistance whilst offering an exceptional level of comfort. The foamed nitrile palm coating provides optimised grip, especially in wet and oily conditions as it channels liquids away from the surface. The Dyflex® Plus N also has a flat nitrile reinforcement between the thumb and forefinger which offers additional protection in an area of the glove that is highly susceptible to wear and tear. This, together with the glove's high abrasion resistance, increases durability and ensures longevity. The elasticated knit wrist safeguards the hands from dust and debris.

Typically used for:

- Engineering
- Ceramics Handling
- Construction
- Ground Work
- Knife/Blade Handling
- Press Works
- Steel Manufacturing & Handling

Case Quantity:

10 pairs per polybag
40 pairs per case
